

# Good luck and enjoy the C4C experience!

Hola amigos in Benin! A shout out from Bolivia, where we are finalizing the C4C experience. Tomorrow we are going back to the community to present the materials we created based on our research and the feedback we received from members of the community who are our target audience: maize and bean producers from an indigenous guarani community. I wish you all the best in the training, I hope you learn as much as I have and that you enjoy it.

Best from Santa Cruz, Bolivia

Natalie
